

IN THE CLAIMS:

The following is a complete listing of the claims and replaces all earlier listings and all earlier versions.

1. (Currently Amended) A method of automatically selecting a font from a collection of fonts for use in one or more captions associated with one or more images, wherein the method comprises the steps of:

automatically selecting one or more fonts from said ~~collections~~ collection of fonts, based on information provided with the one or more images; and

setting the font of the one or more captions to one of the selected one or more fonts.

2. (Currently Amended) A method as claimed in claim 1, wherein the one or more images ~~comprises~~ comprise one image.

3. (Currently Amended) A method as claimed in claim 2, wherein ~~said~~ the information ~~may comprise~~ comprises one or more of the following: ~~[[b)]]~~ Time of day; ~~[[c)]]~~ Location ~~[[GPS)]]~~ information; ~~[[d)]]~~ User provided keywords; and ~~(e) Colour~~ Color information.

4. (Currently Amended) A method of automatically selecting a font from a collection of fonts for use in one or more captions associated with one or more images, wherein the method comprises the steps of:

~~analysing~~ analyzing meta-data associated with the one or more images to determine a key feature amongst the meta-data;

searching a library of fonts, each said font having a set of one or more associated key features;

automatically selecting one or more fonts from the font library having an associated said key feature best matching the said determined key feature; and

setting a font of the one or more captions to one of the selected one or more ~~[[one]]~~ fonts.

5. (Currently Amended) A method as claimed in claim 4, wherein said key feature ~~includes~~ comprises one of the following: (a) Same date and time within a particular range; (b) Same date and location; (c) same Keyword matching; (d) Same date and keyword; and (e) same ~~Colour~~ Color similarities.

6. (Currently Amended) A method as claimed in claim 4, wherein the method further comprises the ~~steps~~ step of:

inserting and displaying the one or more captions associated with the one or more images in a predefined default font, prior to said ~~analysing~~ analyzing step.

7. (Currently Amended) A method as claimed in claim 6, wherein the setting step comprises the ~~substep~~ substeps of:

replacing the predefined default font with one of the selected one or more fonts; and

displaying the one or more captions associated with the one or more images in the replaced font.

8. (Currently Amended) A method as claimed in claim 4, wherein the method further comprises the ~~steps~~ step of:

inserting and displaying the one or more captions associated with the one or more images in one of the selected one or more fonts.

9. (Currently Amended) A method as claimed in claim 6, wherein if ~~said selecting step is unable to find~~ meta-data associated with the one or more images is not found in said selecting step, the one or more captions remain in the predefined default font.

10. (Currently Amended) A method as claimed in claim 6, wherein if ~~said searching step feature is unable to find~~ a best matching key feature is not found in said searching step, the one or more captions remain in the predefined default font.

11. (Currently Amended) A method as claimed in claim 4, wherein the one or more images comprise a plurality of images and said ~~analysing~~ analyzing step

comprises ~~analysing~~ analyzing meta-data associated with the plurality of images to find a most common key feature amongst the meta-data, and said selecting step comprises selecting one of fonts of the font library having an associated said key feature best matching the common key feature.

12. (Currently Amended) A method as claimed in claim 4, wherein said automatic selection step ~~selects~~ includes selecting one said font of the font library having an associated said key feature best matching the said determined key feature and said setting step automatically sets a font of the one or more captions to said selected font.

13. (Original) A method as claimed in claim 4, wherein said setting step comprises the substeps of:

manually selecting one of said automatically selected fonts by a user; and
setting the font of the one or more captions to said manually selected font.

14. (Withdrawn) A method of automatically selecting a theme from a collection of themes for use in one or more objects associated with one or more pages, wherein the method comprises the steps of:

automatically selecting one or more themes from said collections of themes, based on information provided with the said one or more pages; and
setting the theme of the one or more objects with one of the selected one or more themes.

15. (Withdrawn) A method as claimed in claim 14, wherein said one or more objects comprise one or more of: image frames on said one or more pages; background of said one or more pages; clip art on said one or more pages.

16. (Withdrawn) The method as claimed in claim 14, wherein said information comprise meta-data associated with one or more images on said page and dates associated with said one or more images.

17. (Withdrawn) A method as claimed in claim 14, wherein said automatic selection step selects one said theme from the collection of themes and said setting step automatically sets the theme of the one or more objects to said automatically selected theme.

18. (Withdrawn) A method as claimed in claim 14, wherein said setting step comprises the substeps of:

manually selecting one of said automatically selected themes by a user; and
setting the theme of the one or more objects to said manually selected font.

19. (Currently Amended) A method of automatically selecting a font from a collection of fonts for use in one or more texts, wherein the method comprises the steps of:

automatically selecting one or more fonts from said ~~collections~~ collection of fonts, based on information associated with said one or more texts; and

setting the font of the one or more texts to one of the selected one or more fonts.

20. (Original) A method as claimed in claim 19, wherein the one or more texts have predefined font attributes and said setting step comprises the substep of replacing the predefined font attributes with the set font.

21. (Currently Amended) A method as claimed in claim 19, wherein said automatic selection step ~~selects~~ includes selecting one said font from the collection of fonts and said setting step includes automatically ~~sets~~ setting the font of the one or more texts to said automatically selected font.

22. (Original) A method as claimed in claim 19, wherein said setting step comprises the substeps of:

manually selecting one of said automatically selected fonts by a user; and

setting the font of the one or more texts to said manually selected font.

23. (Currently Amended) A method of automatically selecting a font from a collection of fonts for use in one or more hyperlink texts, wherein the one or more texts are in an initial font and the method comprises the steps of:

automatically selecting one said font from said ~~collections~~ collection of fonts, based on information associated with said one or more hyperlink texts; and replacing the initial font of the one or more hyperlink texts with the selected font.

24. (Original) A method as claimed in claim 23, wherein said information comprises the type and content of the hyperlink texts.

25. (Currently Amended) ~~Apparatus~~ An Apparatus for automatically selecting a font from a collection of fonts for use in one or more captions associated with one or more images, wherein the apparatus comprises:

means for automatically selecting one or more fonts from said ~~collections~~ collection of fonts, based on information provided with the one or more images; and means for setting the font of the one or more captions to one of the selected one or more fonts.

26. (Currently Amended) ~~Apparatus~~ An Apparatus for automatically selecting a font from a collection of fonts for use in one or more captions associated with one or more images, wherein the apparatus comprises:

means for ~~analysing~~ analyzing meta-data associated with the one or more images to determine a key feature amongst the meta-data;

means for searching a library of fonts, each said font having a set of one or more associated key features;

means for automatically selecting one or more fonts from the font library having an associated said key feature best matching the said determined key feature; and

means for setting a font of the one or more captions to one of the selected one or more ~~[[one]]~~ fonts.

27. (Withdrawn) Apparatus for automatically selecting a theme from a collection of themes for use in one or more objects associated with one or more pages, wherein the apparatus comprises:

means for automatically selecting one or more themes from said collections of themes, based on information provided with the said one or more pages; and

means for setting the theme of the one or more objects with one of the selected one or more themes.

28. (Currently Amended) ~~Apparatus~~ An Apparatus for automatically selecting a font from a collection of fonts for use in one or more texts, wherein the apparatus comprises:

means for automatically selecting one or more fonts from said ~~collections~~ collection of fonts, based on information associated with said one or more texts; and

means for setting the font of the one or more texts to one of the selected one or more fonts.

29. (Currently Amended) ~~Apparatus~~ An Apparatus for automatically selecting a font from a collection of fonts for use in one or more hyperlink texts, wherein the one or more texts are in an initial font and the apparatus comprises:

means for automatically selecting one said font from said ~~collections~~ collection of fonts, based on information associated with said one or more hyperlink texts; and

means for replacing the font of the one or more hyperlink texts with the selected font.

30. (Currently Amended) A computer program product comprising a computer program for automatically selecting a font from a collection of fonts for use in one or more captions associated with one or more images, wherein the computer program comprises:

means for automatically selecting one or more fonts from said ~~collections~~ collection of fonts, based on information provided with the one or more images; and

means for setting the font of the one or more captions to one of the selected one or more fonts.

31. (Currently Amended) A computer program product comprising a computer program for automatically selecting a font from a collection of fonts for use in one or more captions associated with one or more images, wherein the computer program comprises:

means for ~~analysing~~ analyzing meta-data associated with the one or more images to determine a key feature amongst the meta-data;

means for searching a library of fonts, each said font having a set of one or more associated key features;

means for automatically selecting one or more fonts from the font library having an associated said key feature best matching the said determined key feature; and

means for setting a font of the one or more captions to one of the selected one or more ~~[[one]]~~ fonts.

32. (Withdrawn) A computer program product comprising a computer program for automatically selecting a theme from a collection of themes for use in one or more objects associated with one or more pages, wherein the computer program comprises:

means for automatically selecting one or more themes from said collections of themes, based on information provided with the said one or more pages; and

means for setting the theme of the one or more objects with one of the selected one or more themes.

33. (Currently Amended) A computer program product comprising a computer program for automatically selecting a font from a collection of fonts for use in one or more texts, wherein the computer program comprises:

means for automatically selecting one or more fonts from said ~~collections~~ collection of fonts, based on information associated with said one or more texts; and

means for setting the font of the one or more texts to one of the selected one or more fonts.

34. (Currently Amended) A computer program product comprising a computer program for automatically selecting a font from a collection of fonts for use in one or more hyperlink texts, wherein the one or more texts are in an initial font and the computer program comprises:

means for automatically selecting one said font from said ~~collections~~ collection of fonts, based on information associated with said one or more hyperlink texts; and

means for replacing the font of the one or more hyperlink texts with the selected font.
